

ST Diodes Finder

the new app for Android and iOS

Get the right DIODE for your application with a touch on your screen

Like ST-DIODE-FINDER is the application available for Android™ and iOS™ that allows you to explore the ST diode product portfolio using portable devices. You can easily define the device that best fits your application using the parametric or series search engine. You can also find your product thanks to the efficient part number search engine.

KEY FEATURES AND BENEFITS

- Parametric, part number and series search capability for products
- Technical datasheet downloading and offline consulting
- Access to main product specifications (main electrical parameters, product general description, key features and marketing status)
- Favorites section for products and datasheets
- Ability to share technical documentation via social media or via email
- Available in Android™ and iOS™ app stores
